

CDL PHARMA

Efficient tools for clinical research

CDL Pharma offers a comprehensive system for centralized biological analyses in clinical research.

Our range of customized and complementary services is designed for pharmaceutical laboratories, CROs, biotechnology companies, food processing industry and all participants in biomedical research.

> Centralized biology

Routine analyses in biochemistry, immunology, hematology, microbiology, molecular biology

> Customized assays

Development of assays in immunology and molecular biology

> Sampling kits

Kit design and production, supplying and stock management for each investigator centers

> Sample logistics

Shipment management and traceability

> Biobanking

Short, medium and long-term storage
-196°C, -80°C, -20°C, +4°C, room temperature
Sample library of qualified biological samples

> Biostatistics and data management

From data entry to file exportation
Study design, statistical reports,
and paper writing

> Beta-Testing in biological diagnostics

Development, assessment and validation of
biological diagnostics technologies
